SUMMARY

I am a full stack developer with a passion for building meaningful products with more than 8 years of experience mostly in startups. I started my career on php, codeigniter, wordpress, mysql back in 2011 and picked up other technologies such as django, express, react, angular, react-native, vue, mongo, docker, kubernetes as per work requirements.

PROFILE

- **Top expertise** in Web Application Frontend architecture, development and scaling with React, Redux, SSR etc.
- **Currently** working on developing a scalable backend architecture with nodejs.
- **Other skills:** ReactNative, Express, Hapi, Django, Laravel, Wordpress
- **Outside work:** Love cats, cycling and attending local tech conferences.
